Experimental Dermatology

An International Journal for Rapid Publication of Short Reports in Experimental Dermatology

Effective from 2013 volume, Experimental Dermatology is published in an online-only format.

Aim and Scope

Experimental Dermatology provides a vehicle for the rapid publication of innovative and definitive reports, letters to the editor and review articles covering all aspects of experimental dermatology. Preference is given to papers of immediate importance to other investigators, either by virtue of their new methodology, experimental data or new ideas. The essential criteria for publication are clarity, experimental soundness and novelty. Letters to the editor related to published reports may also be accepted, provided that they are short and scientifically relevant to the reports mentioned, in order to provide a continuing forum for discussion. Review articles will represent a state-of-the-art overview and are invited by the editors. www.wileyonlinelibrary.com/journal/EXD
